India-France Year of Innovation 2026

Subject: Registration Query — Pre-Incorporation Startup / CIN Field

Dear Team,

I am Dhyaneswaran, Founder of Buteforce, a Chennai-based AI systems company. I am in the process of completing my profile on the IFCCI Innovation Network as part of the India-France Year of Innovation 2026 initiative.

During registration, I encountered a mandatory field requesting a Corporate Identification Number (CIN). Buteforce is currently a pre-incorporation entity — we operate as a functioning business with live client deployments and production AI systems, but the formal company registration with the Ministry of Corporate Affairs is still in progress.

I would like to request guidance on how early-stage or pre-incorporation startups can complete the KYC verification step. I am fully prepared to provide alternative documentation — a founder declaration, a business affiliation letter, proof of ongoing operations, or any other format your team requires — to verify my identity and affiliation.

Buteforce builds and deploys industrial AI systems — computer vision for manufacturing quality control and retail analytics — and is actively looking to connect with French industrial companies operating in India through this network. I am keen to complete the registration and participate in the India-France innovation ecosystem.

Please let me know how to proceed. I am happy to provide any supporting documents at your earliest convenience.

Warm regards,

Dhyaneswaran

Founder & AI Architect
